System Integration and Architecture

Full Regression Test Report

Project Title: Knock Knock

Prepared By: Villadarez, Niña Nicole S.

Version: 1.0

Date: May 09, 2026

Project Information

Field	Details
Project Name	Knock Knock
Course & Section	IT342 - G4
Report Title	Full Regression Test Report
Version	1.0
Branch Tested	tech/architecture/apply-vsa
Testing Date/s	May 05, 2026 May 06, 2026
Repository Link	https://github.com/theninanicole/IT342_KnockKnock_G4_Villadarez
Test Environment	Local
Prepared By	Villadarez, Niña Nicole S.

1.0 Purpose of Regression Testing

This regression test was conducted to verify that the Knock Knock system still works correctly after refactoring and project restructuring.

The testing focused on confirming that all currently implemented functional requirements remain operational, including authentication, visitor visit management, condominium admin workflows, QR generation, notifications, profile management, status history, and mobile app functionality.

Features that are not part of the current implementation, such as profile image upload, file metadata handling, automatic visit reminders, mobile QR scanning, and audit logs for visit edits, are not included in this regression report.

2.0 Refactoring Summary

Area	Refactoring Performed	Expected Benefit
Backend	Reorganized backend code into feature-based packages such as auth, condo, notification, user, and visit.	Improves code organization, maintainability, and separation of responsibilities.
Web	Reorganized frontend files	Makes the React app easier

Area	Refactoring Performed	Expected Benefit
	into features, shared components, routes, layouts, and API libraries.	to navigate, maintain, and extend.
Mobile	Reorganized Android code into feature-based packages for authentication and visits, with shared session handling.	Improves mobile code structure and separates feature logic from shared utilities.
Shared Utilities	Moved reusable helper logic into shared folders.	Reduces duplicate code and improves consistency across modules.
API / Services	Grouped API service logic based on system features.	Makes API calls easier to locate, test, and update.
UI Components	Organized reusable UI components separately from feature-specific components.	Improves frontend consistency and reusability.

2.1 Summary of Major Changes

- Backend controllers, services, entities, repositories, and DTOs were reorganized into vertical feature modules.
- Web pages were connected to feature-based views, hooks, components, and services.
- Shared frontend utilities and reusable UI components were separated from feature folders.
- Mobile authentication, visit, and session-related files were organized into feature and shared packages.
- Existing routes, imports, and service references were updated to match the new project structure.

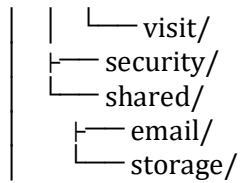

3.0 Updated Project Structure

Backend Structure

4.0 Test Plan Documentation

Item	Details
Test Plan Document	docs/Software Test Plan.md
Test Type	Full Regression Testing
Testing Method	Manual Testing and Automated Testing
Scope	All currently implemented functional requirements
Platforms Covered	Backend, Web, Mobile
Test Data Used	Visitor account, admin account, condominium record,

Item	Details
	scheduled visit, checked-in visit, past visit, and notifications

4.1 Functional Areas Covered

Module	Covered?	Remarks
Authentication	Yes	• Visitor/admin login and registration tested. • Email registration tested. • Admin and condo creation tested. • Mobile app visitor authentication tested.
Security	Yes	Unauthorized access tested.
Visitor Management	Yes	• Visitor can create scheduled visits. • Scheduled future visit editing tested. • Scheduled visit cancellation tested. • Missed scheduled visit behavior tested. • Mobile app dashboard visit loading tested.
QR System	Yes	• QR URL generation tested. • QR email validation tested.
Admin Management	Yes	• Admin visit list tested. • Admin status filters tested. • Reference lookup and QR scanner workflow tested where available. • Admin check-in and check-out tested. • Visit status history display tested.
Notifications	Yes	Notification list and mark-

Module	Covered?	Remarks
		as-read tested.
Profile Management	Yes	• Profile update tested. • Password change validation tested.

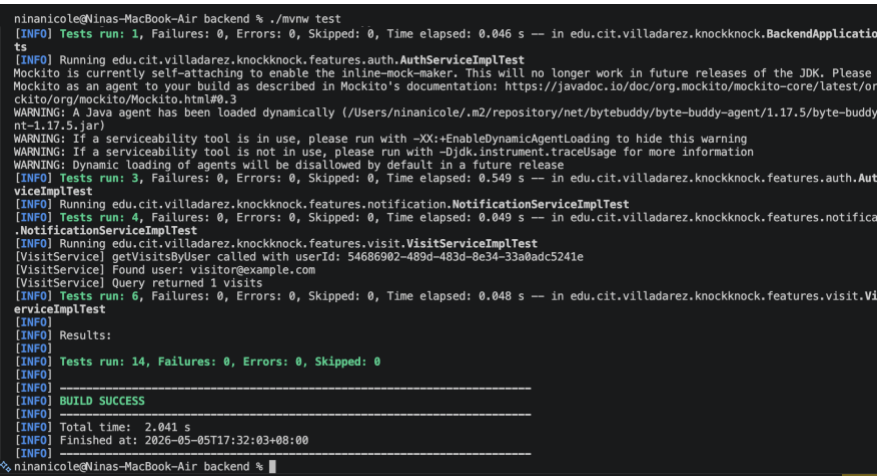

5.0 Test Environment

Component	Specification
Operating System	macOS
Browser/s Used	Google Chrome
Android Emulator / Device	Android API 35
Backend Framework	Spring Boot
Frontend Framework	React + Vite
Mobile Framework	Android Kotlin
Database	Supabase (PostgreSQL)
Storage Service	Supabase Storage
Email Service	SendGrid SMTP
API Base URL	http://localhost:8080/api
Web URL	http://localhost:5173/
Test Account - Visitor	visitor@gmail.com testing
Test Account - Admin	admin@gmail.com RialaTower!Pass1

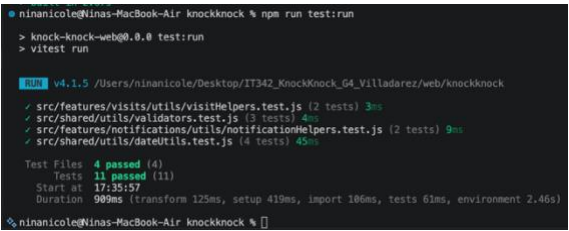

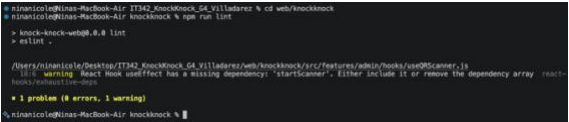

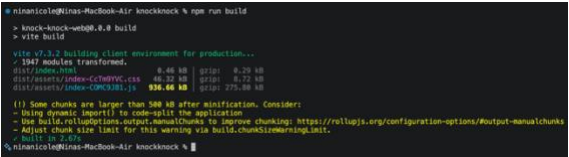

6.0 Automated Test Evidence

6.1 Backend Automated Tests

Field	Details
Command Used	cd backend && ./mvnw test
Date / Time Run	May 05, 2026 / 4:27 PM
Result	Passed

Field	Details
Number of Tests Passed	14
Number of Tests Failed	0
Evidence Screenshot / Log File	 <pre> ninanicole@Ninas-MacBook-Air backend % ./mvnw test [INFO] Tests run: 1, Failures: 0, Errors: 0, Skipped: 0, Time elapsed: 0.046 s -- in edu.cit.villadarez.knocknock.BackendApplicationTests [INFO] Running edu.cit.villadarez.knocknock.features.auth.AuthServiceImplTest Mockito is currently self-attaching to enable the inline-mock-maker. This will no longer work in future releases of the JDK. Please Mockito as an agent to your build as described in Mockito's documentation: https://javadoc.io/doc/org.mockito/mockito-core/latest/org.mockito.org/mockito/Mockito.html#0.3 WARNING: A Java agent has been loaded dynamically (/Users/ninanicole/.m2/repository/net/bytebuddy/byte-buddy-agent/1.17.5/byte-buddy-agent-1.17.5.jar) WARNING: If a serviceability tool is in use, please run with -XX:+EnableDynamicAgentLoading to hide this warning WARNING: If a serviceability tool is not in use, please run with -Djdk.instrument.traceUsage for more information WARNING: Dynamic loading of agents will be disallowed by default in a future release [INFO] Tests run: 3, Failures: 0, Errors: 0, Skipped: 0, Time elapsed: 0.549 s -- in edu.cit.villadarez.knocknock.features.auth.AuthServiceImplTest [INFO] Running edu.cit.villadarez.knocknock.features.notification.NotificationServiceImplTest [INFO] Tests run: 4, Failures: 0, Errors: 0, Skipped: 0, Time elapsed: 0.049 s -- in edu.cit.villadarez.knocknock.features.notification.NotificationServiceImplTest [INFO] Running edu.cit.villadarez.knocknock.features.visit.VisitServiceImplTest [VisitService] getVisitsByUser called with userId: 54686982-489d-483d-8e34-33a0adc5241e [VisitService] Found user: visitor@example.com [VisitService] Query returned 1 visits [INFO] Tests run: 6, Failures: 0, Errors: 0, Skipped: 0, Time elapsed: 0.048 s -- in edu.cit.villadarez.knocknock.features.visit.VisitServiceImplTest [INFO] Results: [INFO] Tests run: 14, Failures: 0, Errors: 0, Skipped: 0 [INFO] BUILD SUCCESS [INFO] Total time: 2.041 s [INFO] Finished at: 2026-05-05T17:32:03+08:00 [INFO] % ninanicole@Ninas-MacBook-Air backend % </pre>
Remarks	Backend test suite passed with no failures.

6.2 Web Automated Checks

Check	Command Used	Result	Evidence	Remarks
Utilities	cd web/knockknock && npm run test:run	Passed	 <pre> % ninanicole@Ninas-MacBook-Air knockknock % npm run test:run > knock-knock-web@0.0.0 test:run > vitest run v4.1.5 /Users/ninanicole/Desktop/IT342_KnockKnock_G4_Villadarez/web/knockknock ✓ src/features/visits/visits.test.js (2 tests) 3ms ✓ src/shared/validators.test.js (3 tests) 4ms ✓ src/features/notifications/notifications.test.js (2 tests) 9ms ✓ src/shared/validators.test.js (4 tests) 45ms Test Files 4 passed (4) Tests 11 passed (11) Start at 17:35:57 Duration 909ms (transform 125ms, setup 419ms, import 106ms, tests 63ms, environment 2.46s) % ninanicole@Ninas-MacBook-Air knockknock % </pre>	All 4 test files passed (11 tests total).
Lint	cd web/knockknock && npm run lint	Blocked	 <pre> % ninanicole@Ninas-MacBook-Air IT342_KnockKnock_G4_Villadarez % cd web/knockknock % ninanicole@Ninas-MacBook-Air knockknock % npm run lint > knock-knock-web@0.0.0 lint > eslint /Users/ninanicole/Desktop/IT342_KnockKnock_G4_Villadarez/web/knockknock/src/features/visits/visits.test.js 1:1 warning React Hook useEffect has a missing dependency: 'startCamera'. Either include it or remove the dependency array. react-hooks/exhaustive-deps * 1 problem (0 errors, 1 warning) % ninanicole@Ninas-MacBook-Air knockknock % </pre>	Missing dependency
Build	cd web/knockknock && npm run build	Passed	 <pre> % ninanicole@Ninas-MacBook-Air knockknock % npm run build > knock-knock-web@0.0.0 build > vite build vite v7.3.2 building client environment for production... dist/index.html 8.48 kB (gzip) 0.29 kB dist/assets/index-0299c3c0.js 60.20 kB (gzip) 0.72 kB dist/assets/index-0299c3c0.js 936.66 kB (gzip) 275.88 kB (!) Some chunks are larger than 500 kB after minification. Consider: - Using dynamic import() to code-split the application - Use build.rollupOptions.output.manualChunks to improve chunking: https://rollupjs.org/configuration-options/#output-manualchunks - Adjust chunk size limit for this warning via build.chunkSizeWarningLimit. build 10.24s % ninanicole@Ninas-MacBook-Air knockknock % </pre>	Some chunks are larger than 500 kB

6.3 Mobile Automated Tests

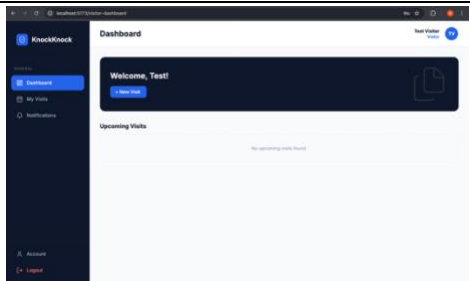

Check	Command Used	Result	Evidence	Remarks
-------	--------------	--------	----------	---------

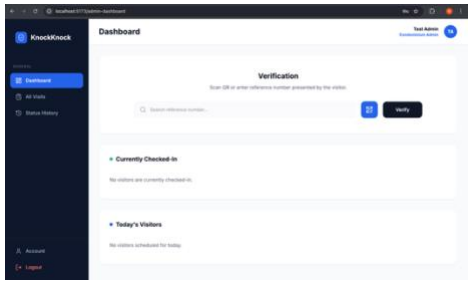

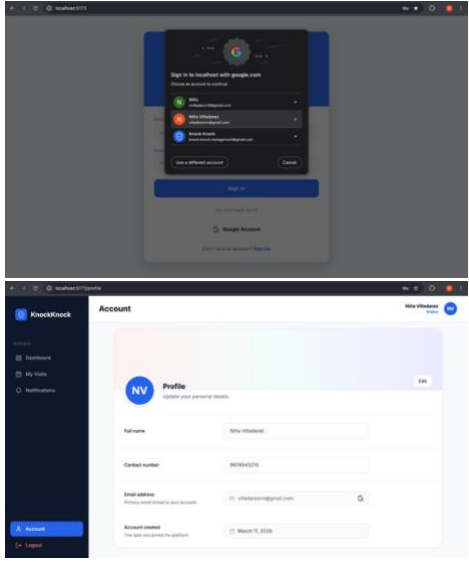

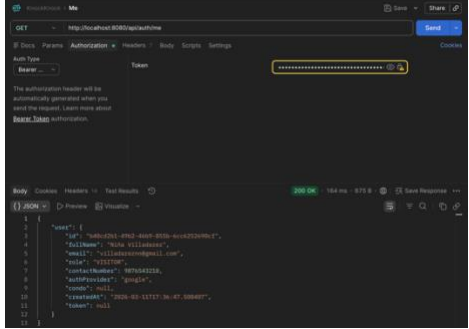

Check	Command Used	Result	Evidence	Remarks
Unit Tests	cd mobile && JAVA_HOME=/Library/Java/JavaVirtualMachines/temurin-21.jdk/Contents/Home ./gradlew test	Passed		Gradle unit test suite passed successfully.
Instrumented Test Build	cd mobile && JAVA_HOME=/Library/Java/JavaVirtualMachines/temurin-21.jdk/Contents/Home ./gradlew assembleDebugAndroidTest	Passed		Android instrumentation test APK built successfully using Java 21.

6.4 Automated Test Summary

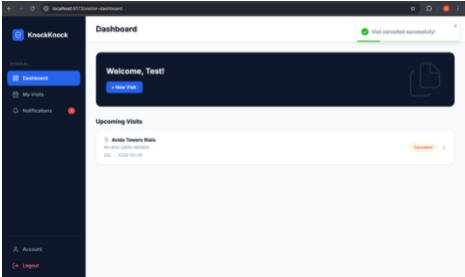

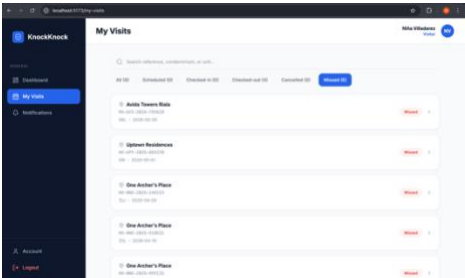

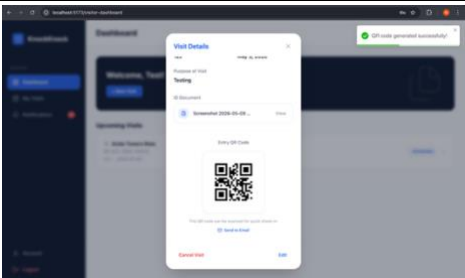

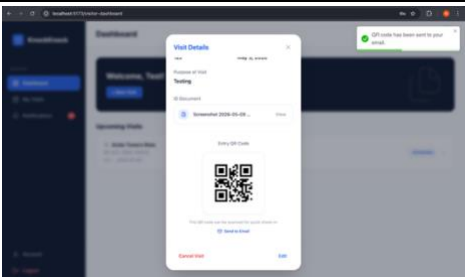

Layer	Total Tests / Checks	Passed	Failed	Blocked
Backend	14	14	0	0
Web	13	12	0	1
Mobile	2	2	0	0
Total	29	28	0	1

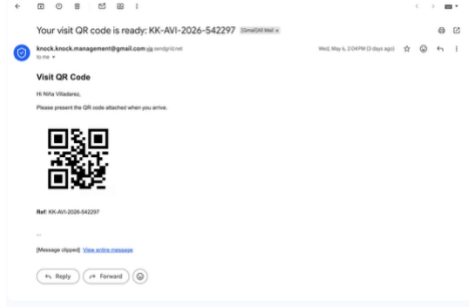

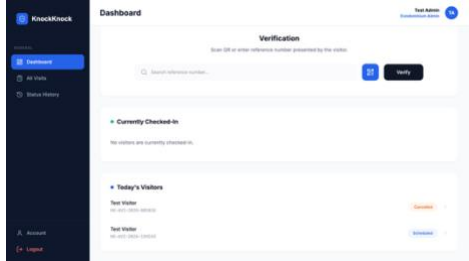

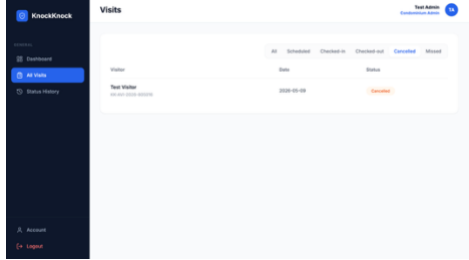

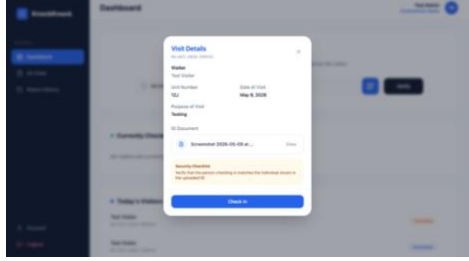

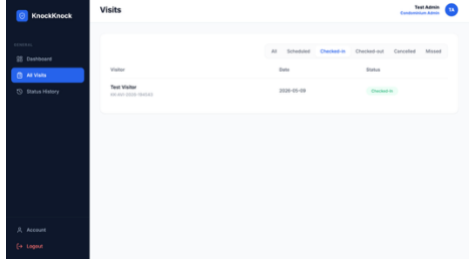

7.0 Regression Test Results

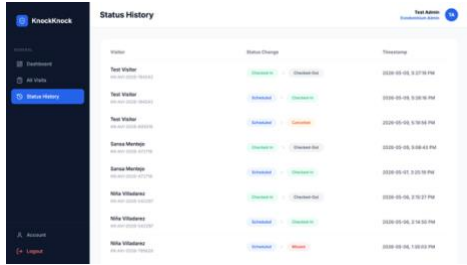

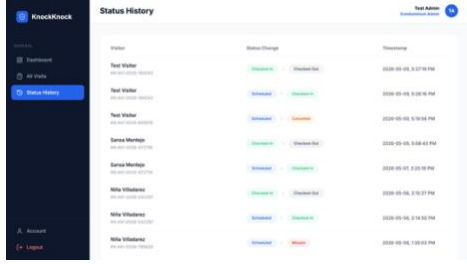

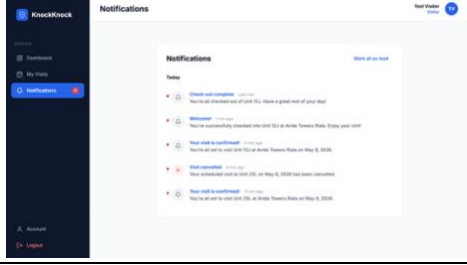

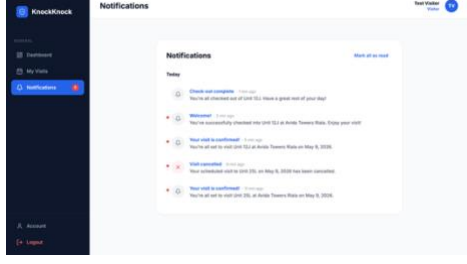

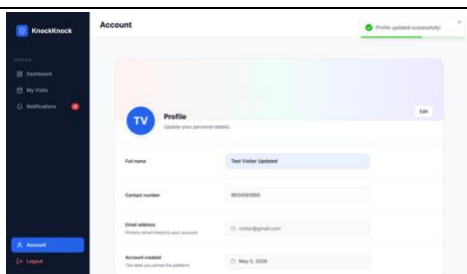

Test Case ID	Test Scenario	Expected Result	Actual Result	Status
TC-01	Register visitor with valid details	Visitor account is created and user can access visitor pages.		Passed

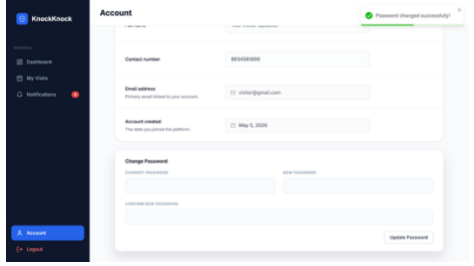

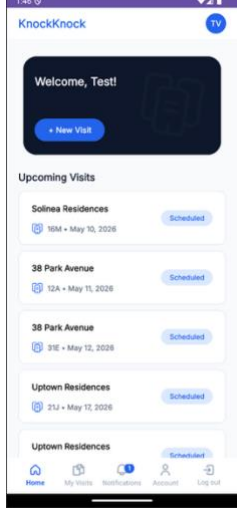

Test Case ID	Test Scenario	Expected Result	Actual Result	Status
TC-02	Register condominium admin	Admin account created and new condominium details is saved linked to the admin.		Passed
TC-03	Login with valid credentials	User logs in successfully and is redirected based on role.		Passed
TC-04	Google authentication	Successfully logged into the registered Google account; the email field displays the Google logo within the profile.		Passed
TC-05	Retrieve current user using JWT	Valid token returns current user details; invalid token is rejected.		Passed

Test Case ID	Test Scenario	Expected Result	Actual Result	Status
			Using invalid token	
TC-06	Direct protected access without login	User is redirected to login or receives unauthorized response.	User is redirected to login page.	Passed
TC-07	Schedule a new visit	Visit is created with SCHEDULED status and reference number.		Passed
TC-08	View own visits	Logged-in visitor sees only their own visits.		Passed
TC-09	Edit scheduled future visit	Visit details are updated successfully.		Passed

Test Case ID	Test Scenario	Expected Result	Actual Result	Status
				
TC-10	Cancel scheduled visit	Visit status changes to CANCELLED.		Passed
TC-11	Missed scheduled visit	Missed scheduled visit is marked as MISSED.		Passed
TC-12	Generate QR code for visit	QR image URL is generated for scheduled or checked-in visit.		Passed
TC-13	Email QR code to visitor	QR email is sent successfully after QR is generated.		Passed

Test Case ID	Test Scenario	Expected Result	Actual Result	Status
			 Your visit QR code is ready: KK-AVI-2026-542297 Visit QR Code Hi Nitya Viswanath, Please present the QR code attached when you arrive. Ref: KK-AVI-2026-542297 [Message Unsent] View QR Code Reply Forward	
TC-14	View visits for assigned condo	Admin sees only visits from assigned condominium.	 KnockKnock Dashboard Verification Scan QR or enter reference number presented by the visitor. Search reference number Verify Currently Checked-In No visitors are currently checked-in. Today's Visitors Test Visitor KK-AVI-2026-542297 Checked-In Test Visitor KK-AVI-2026-542297 Checked-In	Passed
TC-15	Filter visits by status	Visit list updates based on selected status filter.	 KnockKnock Visits Filter: All Scheduled Checked-in Checked-out Cancelled Missed Visitor Date Status Test Visitor KK-AVI-2026-542297 2026-05-08 Checked-In	Passed
TC-16	Verify visit by reference or QR	Matching visit details are displayed.	 KnockKnock Visit Details Visitor Test Visitor Visit Number KK-AVI-2026-542297 Date of Visit May 8, 2026 Reference of Visit Ref: KK-AVI-2026-542297 Reference of Visit Ref: KK-AVI-2026-542297 Check-In Visit details are displayed in a modal.	Passed
TC-17	Perform check-in	Visit status changes to CHECKED-IN and check-in time is recorded.	 KnockKnock Visits Filter: All Scheduled Checked-in Checked-out Cancelled Missed Visitor Date Status Test Visitor KK-AVI-2026-542297 2026-05-08 Checked-In	Passed

Test Case ID	Test Scenario	Expected Result	Actual Result	Status
TC-18	Perform check-out	Visit status changes to CHECKED-OUT and check-out time is recorded.		Passed
TC-19	View visit status history	Status history shows previous status, new status, action, and timestamp.		Passed
TC-20	View notifications	User notifications are displayed in descending order.		Passed
TC-21	Mark notification as read	No red dot displayed for read notifications.		Passed
TC-22	Update profile details	Updated full name or contact number is saved.		Passed

Test Case ID	Test Scenario	Expected Result	Actual Result	Status
TC-23	Change account password	Password is updated when current password and confirmation are valid.		Passed
TC-24	Mobile login, registration, session, dashboard, and notifications	Android app authenticates visitor, saves session, and loads dashboard data without crashing.		Passed

8.0 Issues Found

Issue ID	Module	Description	Steps to Reproduce	Expected Result	Actual Result	Severity	Status
BUG-001	Visit Management	Allows creating visits using past dates.	Create a visit with a past visit date.	System should reject past visit dates during creation.	Visit can be created, then later becomes MISSED when retrieved.	Medium	Fixed
BUG-002	Authenti	Web's	Log in as	Visitor	Visitor	Medium	Fixed

Issue ID	Module	Description	Steps to Reproduce	Expected Result	Actual Result	Severity	Status
	cation	protected routes only checks if a user exists, but does not validate user role before allowing admin page.	visitor and manually open /admin-dashboard or /admin/all-visits.	should be redirected or shown access denied.	can access admin route UI, although backend API blocks the data.		
BUG-003	QR System	ESLint reports a React Hook dependency warning in useQRScanner.js.	Run npm run lint.	Lint should pass with no warnings.	Lint shows missing dependency warning for startScanner.	Low	Fixed

9.0 Fixes Applied

Fix ID	Related Issue ID	Description of Fix	Files / Modules Affected	Remarks
FIX-001	BUG-001	Add past-date validation during visit creation.	VisitServiceImpl, visit forms	Past visit dates are now blocked during creation on backend, web, and mobile.
FIX-002	BUG-002	Add role-based frontend route protection.	ProtectedRoute, AppRouter	Frontend routes now enforce role-based access and

Fix ID	Related Issue ID	Description of Fix	Files / Modules Affected	Remarks
				redirect users to the correct dashboard.
FIX-003	BUG-003	Fix React hook dependency warning or remove unused scanner hook.	useQRScanner.js	Non-blocking lint warning.
